

The reason I have XM radio is because of the continuous traffic and weather not found on am or fm radio. It is the first thing on in the morning when I go to work. I choose to pay for this service and the variety of uninterrupted music all day long. I strongly urge the FCC to reject NAB petition 04-160. XM radio is truly a blessing for those of us who commute great distances and want quality music, weather and traffic uninterrupted. Please do not let anyone interfere with that. This is a great country because we are free to make choices and alot of us have choosen XM.
